Company Overview

Diaspora Sdn Bhd, a Bumiputera company was established in 2007, comprises personnel full of experience within their domain. Our human capital has strong knowledge and expertise which we believe is the basis of our excellent service delivery in meeting customer expectations.

Diaspora Sdn Bhd had been certified with MS ISO/IEC 27001:2013 in December 2014. By following the ISO standard we can ensure our client information is securely treated by our policy and procedure.

Our activity offers professional services with deep know-how in the spectrum of ICT infrastructure such as:

- Security Posture Assessment (SPA)
- ISO/IEC 27001:2013 - Information Security Management System (ISMS) developed, implement , maintain and audit process
- Network infrastructure designed, implementation and professional services
- Supply and install telecommunication equipment, facilities and tower.

Exploring new technologies is our embedded culture in ensuring the technical team's knowledge is competitive with current industry trend.

Our Mission

Managing with greatness and untamed strength, improving everything daily.

Our Vision

Leading with inspiration and courage, obsessed with future possibility, and in a love affair with change.

Main Activities

To achieve our mission and vision our business activity is divided into three categories which is Professional ICT Services, Management Systems Services and Technology Products. In Professional IT Services, DIASPORA provides professional and engineering services to our clients. To complement our professional services, Diaspora also have a range of network and security Technology Products available to offer to our potential clients.

1. Professional ICT Services

1.1 Security Posture Assessment (SPA)

The emergence of more varied, targeted attack techniques from the malware and hacking communities, combined with growing regulations of organizational security standing from both government agencies and private industry watchdogs have resulted in a climate in which businesses are increasingly being required to assess their technological vulnerabilities and security defense mechanisms on a regular basis. Thus, Security Posture Assessment (SPA) is essential for every organization. This exercise will examine and test confidentiality, integrity and availability (CIA) of the information infrastructure used by the organization. International Standard such as ISO/IEC 27001:2013 , OPST (OSSTM Professional Security Tester) and OWASP are been used as our benchmark while performing our activities.

Assessment activity includes of:

- Network Architecture and Device Review
- Internal and External Penetration Test
- Security Policy and Procedure Development and Review
- Web Application and Database Assessment
- Server or Host Assessment
- User Desktop Assessment
- Wireless Assessment
- Physical Assessment

SPA is an important process that proactively carried out to ensure that the infrastructure and application architecture implemented is secured from any malicious activities. Diaspora Sdn Bhd has been appointed as panel of consultant by Cyber Security Malaysia to perform Vulnerability Assessment for Malaysian Critical Network Information Infrastructure (CNII) project.

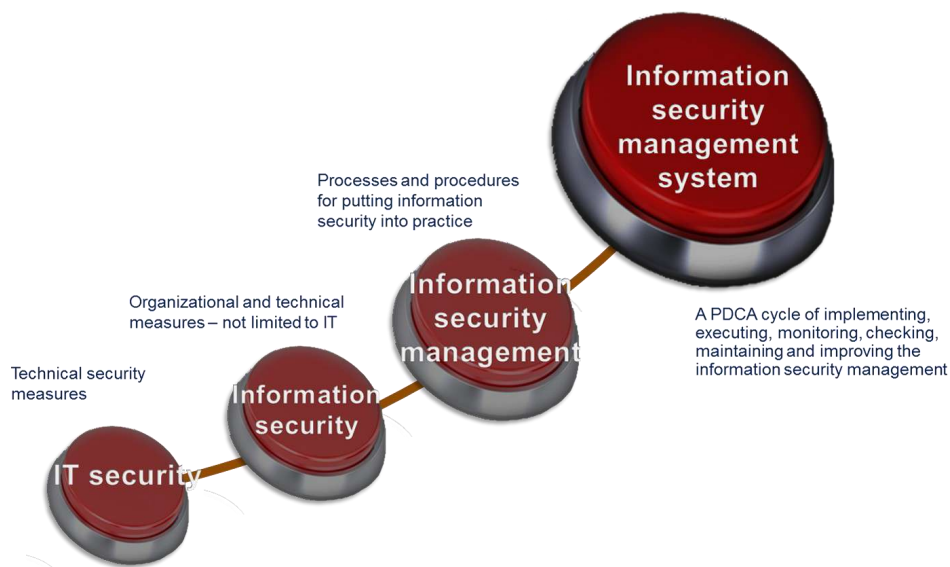

1.2 ISMS Development, Implementation, Maintaining and Auditing

We are pleased to offer the best consulting services to our clients. We anticipate that all organization is adopting an internationally recognized best practice (ISO/IEC 27001:2013) to implement Information Security Management System (ISMS) for its ICT Department in order to provide secure ICT infrastructure and solutions to the organization.

ISO/IEC 27001:2013 is a unique standard for information security encompassing all requirements for information security including Confidentiality, Integrity and Availability (CIA). It provides a comprehensive set of controls to address all issues related to information security. ISO/IEC 27001:2013 aims to provide a common basis for developing organizational security standards, effective security management practice and provide confidence in inter-organizational and intra-organizational information exchange.

Hence, ISO 27001 certification will accrue the following benefits :

- Improve overall information security
- Improve customer confidence and satisfaction
- Improve compliance to security policies and requirements
- Provide competitive edge
- Facilitate continuous security improvement

1.3 Infrastructure Implementation: Structured Cabling and Wireless

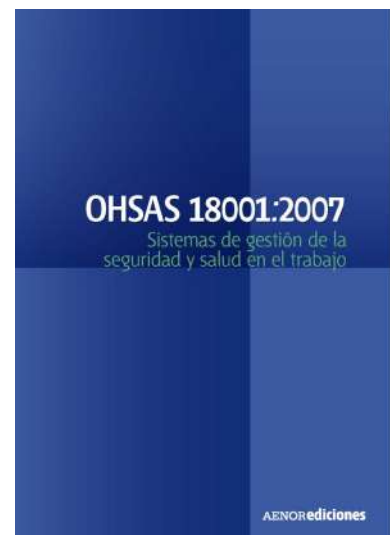

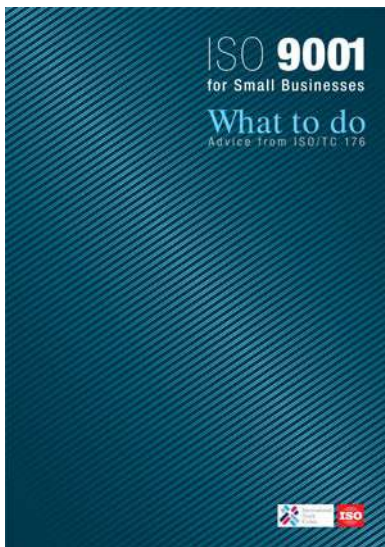

At Diaspora we also have dedicated team who is capable in providing structured cabling for Local Area Network infrastructure. We have implemented cabling in various forms such as Fiber Optic, UTP (Cat 5 and Cat 6), Telephone or Coaxial. We follow ANSI/TIA/EIA-568-B.1-1-2001 and TIA-526-14-A standards for our cabling works. We believe that good physical infrastructure implementation could contribute to a decent network performance and convenient for future maintenance.

2. Other Management Systems Services

Diaspora offers various types of Management System Services such as:

1. **ISO 9001:2008 Quality Management System** A Quality Management System established by the International Organization For Standardization (ISO) that is applicable for all type and size of organizations. An international standard with the objectives to improve the effectiveness of products, services and processes.
2. **ISO 14000:2004 Environmental Management System** An Environmental Management System established by the International Organization For Standardization (ISO) that is applicable for all type and size of organizations. A standard with the objectives to improve the surrounding environment.
3. **OHSAS 18001:2007 Occupational Health & Safety (OHS) Management System** An OHS Management System formerly known as BS 8800 that is applicable to all type and size of organizations. A standard with the objectives of ensuring that a healthy and safe workplace is provided to all employees, visitors, vendors, and subcontractors.

3. Technology Products

3.1 Security and Network Equipment

To complement our services we also partner with security product and network equipment providers that provide these technologies:

- Intrusion Prevention/Detection System (IPS/IDS)
- Firewall Appliance
- Antivirus , Anti Spyware and Anti spamming
- Network Access Control (NAC)
- Edge/Core/Workgroup Switch
- Load Balancer

By associating with company who is leading in network and security industry we are always been updated with the new threat and technology.

List of our preferred products:

4. Telecommunication Equipment, Facilities and Tower

Over the year we have been appointed as sub-contractor to perform various Telco related works. Our teams are equipped with technical skills and knowledge in the Telco industry with wide experience in the installation, commissioning, integration, testing , trouble-shooting as well as operation in environment such as WAH, CIDB, NIOSH TM to undertake challenges that relate to Telco field activities.
