Diaspora Sdn Bhd, a Bumiputera company was established in 2007, comprises personnel full of experience within their domain. Our human capital has strong knowledge and expertise which we believe is the basis of our excellent service delivery in meeting customer expectations.

Diaspora Sdn Bhd had been certified with MS ISO/IEC 27001:2013 in May 2012 By following the ISO standard we can ensure our client information is securely treated by our policy and procedure.

Our activity offers professional services with deep know-how in the spectrum of ICT infrastructure such as:

- Security Posture Assessment (SPA);
- ISO/IEC 27001:2013 - Information Security Management System (ISMS) developed, implement , maintain and audit process; and
- Network infrastructure designed, implementation and professional services.

Exploring new technologies is our embedded culture in ensuring the technical team's knowledge is competitive with current industry trend.

Mission

Managing with greatness and untamed strength, improving everything daily.

Vision

Leading with inspiration and courage, obsessed with future possibility, and in a love affair with change.

Why Choose Us

- ◆ Since 2007, we have provided exceptional services for organizations of all sizes. Our employee's know-how skills have to meet clients' expectations. We love to create value for our customers while providing our services.
- ◆ Our team is equipped with industry-renowned certification.
- ◆ Flexibility to serve you better. We employ a small core staff of security analysts and draw from our pool of subject matter experts when their expertise can help us serve you better. The result? A highly nimble, more efficient approach to giving you the services you need, when you need them.
- ◆ We offer a competitive price range without compromising our quality of service.

To achieve our mission and vision our business activity is divided into three categories which is **Security Posture Assessment (SPA) Services, ISO/IEC Information Security Management Systems (ISMS) Services and Network Design, Implementation and Professional Services.**

1. Security Posture Assessment (SPA)

The emergence of more varied, targeted attack techniques from the malware and hacking communities, combined with growing regulations of organizational security standing from both government agencies and private industry watchdogs have resulted in a climate in which businesses are increasingly being required to assess their technological vulnerabilities and security defense mechanisms on a regular basis. Thus, SPA services is essential for every organization. This exercise will examine and test Confidentiality, Integrity and Availability (CIA) of the information infrastructure used by the organization. International Standard such as ISO/IEC 27001:2013 , OPST (OSSTM Professional Security Tester) and OWASP are been used as our benchmark while performing our activities.

Assessment activity includes of:

- Network Architecture and Device Review
- Internal and External Penetration Test
- Security Policy and Procedure Development and Review
- Web Application and Database Assessment
- Server or Host Assessment
- User Desktop Assessment
- Wireless Assessment
- Physical Assessment

SPA services is an important process that proactively carried out to ensure that the infrastructure and application architecture implemented is secured from any malicious activities. Diaspora Sdn Bhd has been appointed as panel of consultant by Cyber Security Malaysia to perform Vulnerability Assessment for Malaysian Critical Network Information Infrastructure (CNII) project.

2. ISMS Services

We are pleased to offer the best consulting services to our clients. We anticipate that all organization is adopting an internationally recognized best practice (ISO/IEC 27001:2022) to implement ISMS for its ICT Department in order to provide secure ICT infrastructure and solutions to the organization.

ISO/IEC 27001:2022 is a unique standard for information security encompassing all requirements for information security including Confidentiality, **Integrity and Availability (CIA)**. It provides a comprehensive set of controls to address all issues related to information security. ISO/IEC 27001:2022 aims to provide a common basis for developing organizational security standards, effective security management practice and provide confidence in inter-organizational and intra-organizational information exchange.

Hence, ISO 27001 certification will accrue the following benefits :

- Improve overall information security
- Improve customer confidence and satisfaction
- Improve compliance to security policies and requirements
- Provide competitive edge
- Facilitate continuous security improvement

3. Network Design, Implementation and Professional Services

Diaspora offers Network Design, Implementation and Professional Services for the following ICT components:

1. **Network Planning:** Assessing business requirements, defining goals, and creating a strategic plan for the network infrastructure.
2. **Network Architecture Design:** Developing a comprehensive network blueprint, including hardware, software, protocols, and network topology.
3. **Network Security Design:** Implementing security measures to protect the network infrastructure, such as firewalls, intrusion detection systems, and access control mechanisms.
4. **Network Equipment Procurement:** Identifying and procuring the necessary network hardware, including routers, switches, servers, and network cables.
5. **Network Configuration:** Setting up and configuring network devices and components to ensure proper connectivity, addressing, and routing.
6. **Network Integration:** Integrating new network components into existing infrastructure, ensuring compatibility and seamless operation.
7. **Network Testing and Optimization:** Conducting performance tests, troubleshooting network issues, and optimizing network performance for maximum efficiency.
8. **Network Documentation:** Creating detailed documentation of the network design, configuration, and troubleshooting procedures for future reference.
9. **Network Monitoring and Management:** Implementing network monitoring tools to track network health, performance, and security, and providing ongoing management and support.
10. **Network Upgrades and Expansion:** Upgrading network components, adding new features, and expanding the network infrastructure to accommodate growing business needs.
